Subject: Permit Modification for Ecology Control Industries, Inc., 255 Parr Blvd.,
Richmond, CA 94801

The Department of Toxic Substances Control (DTSC) has reviewed Ecology Control Industries' (ECI) request for permit modification and concurs that it is a Class I permit modification.

The modification involved the removal of two, above-ground tanks. Tank #1 was an 1850 gallon, poly, secondary rinse tank. Tank #2 was a 250 gallon, steel, measuring tank.

This change is subject to Class I permit modification which requires Ecology Control Industries to notify the surrounding property owners about the changes. No changes to hazardous waste processing and the Facility will continue to operate under the existing permit conditions.

Additional information regarding these changes may be obtained by calling ECI's Health and Safety Manager, Jeanne Delperdang, at (310) 354-9999 or Michael Zamudio of the Department of Toxic Substances Control at (916) 255-6535.

Sincerely,

A handwritten signature in black ink, appearing to read "Jeanne Delperdang", with a stylized, looping flourish at the end.

Jeanne Delperdang
